AEROSOL  
PART #1099**

**QR CODE:**

Proper sealing of a pruned or grafted tree is vital to its longevity. Failure to achieve a complete and proper seal greatly increases the likelihood of infection from insects. In addition environmental factors such as weather and pollution rapidly accelerate decay. All of these factors can lead to premature death. Sunrise's 911 Pruning Seal was designed specifically to eliminate the problems associated with tree wounds.

**FEATURES & BENEFITS:**

- Smoother spray for easy coating of tree wounds
- Bigger can for more value and less waste
- Better Coverage for quicker and more efficient application

**APPLICATIONS:**

Pruning and Grafting of trees, bushes and other vegetation. Also seal a variety of other items including plastics, metals and wooden products.

**DIRECTIONS:**

1. SHAKE CAN for 1 minute to thoroughly mix 911 Pruning Seal.
2. Spray intended tree wound liberally from a distance of 12-18 inches away. Use short, steady and even strokes while spraying. Best applied when temperature is between 70° - 90° F.
3. To clean spray nozzle for future use, turn can upside down and press spray nozzle for 2 seconds.

Tips - If clogging occurs, rotate spray nozzle 1/4 turn. If clogging continues, remove nozzle and clean with solvent. Gentle replace spray nozzle with a twisting motion.

**CUSTOMERS WHO USED THIS PRODUCT ALSO USED:**

Herbicides, Pesticides, Fertilizers, Lubricants.

**FORMULATION:**

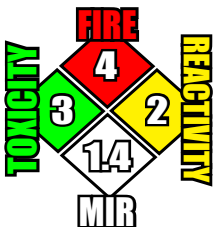

Advanced technology compound made with long lasting, heavy duty and flexible resin.

**IDEAL FOR USE BY:**

Farmers, golf courses, ground maintenance companies and orchards.

**SPECIAL CAUTIONS:**

None.
