

## RELEASE 250

HEAVY-DUTY SYNTHETIC SHAKER PAD LUBRICANT  
*Lubricante Para Gomas De Extractor De Frutos*

RELEASE 250 is a clear, non-toxic silicone spray lubricant designed to lubricate and protect rubber tree-shaker slings. This compound deeply penetrates into rubber and leaves a stable broadcast of silicone to provide a slippery barrier for reduced friction on the rubber to rubber surface. It prevents heat build-up during the tree shaking operation and prevents bark damage to the tree. This clean, non-toxic formula can be used with confidence to provide solutions to a multitude of lubrication problems associated with valves, pistons, rings, seals, slides, tracks, hinges, gears, etc.

### DIRECTIONS

Point trigger toward target area and spray a thin film into the working surface of the shaker sling. As the lubricant impregnates the surface of the rubber, a shiny wet appearance will be maintained. Re-apply approximately once per hour or as conditions warrant.

When new shaker slings are installed it is recommended to pre-soak the working surface of the rubber with RELEASE 230 two or three times at 1-hour intervals prior to installation.
