

THRUSTER

RUST NEUTRALIZING COMPOUND

SPECIALTY
PRODUCTS

THRUSTER chemically neutralizes rust and leaves a long-term preventative coating in its place. **THRUSTER** seals, protects and extends the life of ferrous metal. The application of this compound turns the rusted area into a black protective finish. After curing, the affected area may be painted if desired.

FEATURES & BENEFITS:

Safe- Non-flammable formula.

Fast- Quick curing time. Surface can be painted shortly after application.

Economical- Extends the life of ferrous metal.

APPLICATIONS:

Chemically neutralizing rust converter. Protects, seals and extends the life of metal surfaces. Can be used to prepare surface for painting.

DIRECTIONS:

Clean area to be treated by removing all grease, oil, loose and powdered rust. Knock loose rust off surface with a wire brush. Rinse clean with water. Product may be applied while surface is still damp. Shake container well, then spray, brush or roll on product until entire surface is covered. Let dry. If small pin holes appear in black film apply a second coat. Rinse all application equipment with water before the polymer dries and hardens. Apply when surface temperature is from 50 degrees F to 90 degrees F.

CUSTOMERS WHO USED THIS PRODUCT ALSO USED:
