

AGRI FLUSH

TANK NEUTRALIZER & CLEANER

**OUTDOOR
& INDUSTRIAL
MAINTENANCE**

AGRI-FLUSH was formulated to neutralize and clean containers used to store and spray pesticides, herbicides and fertilizers. Sunrise understands the sensitive nature of vegetation and the importance of proper equipment cleaning. This is why we have developed a product that is powerful, but easy to use. It is safe and effective in adverse situations including hot and cold temperatures, hard water and difficult to remove substances.

FEATURES & BENEFITS:

- Easy to use: simple mixing instructions for tanks and sprayers
- Quick and effective: due to the sensitive nature of plants and insects, it is important to neutralize and clean tanks and sprayers between switching of solutions.

APPLICATIONS:

Neutralization of tanks and sprayer used for application of herbicides, pesticides and fertilizers.

DIRECTIONS:

Tank Use - Mix 1 pound of AGRI-FLUSH per 100 gallons of water. Backpack/Garden Sprayer Use - Mix 1/2 Ounce of AGRI-FLUSH per 3 gallons of water. Remove all pesticide or herbicide from the tank. Fill tank 1/2 full of water. Agitate product to achieve even distribution of product. Continue agitation for 15 minutes ensure all internal tank surfaces have been cleaned. Don't forget the sprayer components/booms/hoses, as these also need to become neutralized. Exact dilution rate may vary by user and solution. In order to verify proper neutralization, the following method may be used. It is recommended the following methods be used. #1 Retain a sample of residual solution. Apply this solution to sensitive plants. Monitor treated vegetation for 48 hours. If plant damage occurs, reclean the tested tank until residual solution no longer effects vegetation. #2 Take a sample of residual solution to a qualified testing laboratory for sample analysis. If sample is positive for herbicides/pesticides reclean the tested tank until residual solution no longer reflects contaminates.

**PACKAGING
AVAILABILITY**
3# QUARTS
& 50# PAILS

PART #4029

QR CODE:

CUSTOMERS WHO USED THIS PRODUCT ALSO USED:

Herbicides, Pesticides, Fertilizers, Lubricants.

FORMULATION:

A blend of neutralizing agents specially designed for herbicides and pesticides.

IDEAL FOR USE BY:

Farmers, golf courses, ground maintenance companies, pest control businesses and homeowners.

SPECIAL CAUTIONS:

None.
